### **ABOUT**

Essential oils are liquid extracts from aromatic plants, which have numerous applications in multiple industries. There are a variety of methods used for the extraction of essential oils, with each method exhibiting certain advantages and determining the biological and physicochemical properties of the extracted oils. Essential oils from different plant species contain more than 200 constituents which are comprised of volatile and non-volatile components. The application of essential oils as antimicrobial, anticancer, anti-inflammatory and anti-viral agents are due to their effective and efficient properties.

Mittal Institute Of Education Organised an in house 3 days workshop on different techniques of oil extraction using heat metal condenser. It has been attended by A group of 25 students. They learned to extract Rose Water, Tulsi And Neem Oil extract from the technique heat metal condenser.

Certificate of participation were also provided to all the students for participating workshop.
