Session 2022-23

REPORT ON INTELLECTUAL PROPERTY RIGHTS

DATED – 2nd FEBRUARY 2023

VENUE – MIT SEMINAR HALL

TIME – 01:00PM TO 02:30PM

Intellectual property is a category of property that includes intangible creations of the human intellect, and primarily encompasses copyrights, patents, and trademarks. It also includes other types of rights, such as trade secrets, moral rights, and rights against unfair competition. Artistic works like music and literature, as well as some discoveries, inventions, words, symbols, and designs can all be protected as intellectual property. The main purpose of intellectual property law is to encourage the creation of a wide variety of intellectual goods. Intellectual property rights refer to the general term for the assignment of property rights through patents, copyrights and trademarks.

Intellectual property plays an important role in providing a competitive edge with respect to tangible assets like inventions, designs, software, brand and innovative ideas. It is necessary to protect these creations in order to enable organizations to earn recognition or financial benefits. The rationale for this IPR Policy lies in the need to create awareness about the importance of IPRs as a marketable financial asset and economic tool among the researchers, faculty and students of MIE.

MIE organized a session on IPR on 2 February 2023 by Shri Aditya Pratap Singh.

Highlights

- It created a great impact on the entire audience. Students were taught on how IPR restricts copying others ideas and how this will help the development of new ideas for the betterment of the society.
- Students learnt how IPR provides total control over a new innovation and its creator.
- They were also given a platform to discuss how small innovations influence societies at large and how they should indulge in innovating and patenting ideas that will be useful for all the classes of individuals in the society
- Patents, trademarks, copyrights, and trade secrets are valuable assets of the company and understanding how they work and how they are created is critical to knowing how to protect them

Total 78 Students of MGI learnt how IPR provides total control over a new innovation and its creator. They were also given a platform to discuss how small innovations influence societies at large and how they should indulge in innovating and patenting ideas that will be useful for all the classes of individuals in the society.

It created a great impact on the entire audience. Students were taught on how IPR restricts copying others ideas and how this will help the development of new ideas for the betterment of the society.
